The aims to be reached in the study of any science are at least two - a knowledge of its underlying principles and as thorough an application of those principles as is possible. If you can get no suitable dish, a regular Petri dish may be obtained through the School for 30 cents and a tube of prepared nutrient gelatine for 20 cents. The dish may be returned. Also, I hope that you will read some of the books recommended in the bibliography. The facts of bacteriology underlie so firmly all our daily living that there is no need to go far afield for illustrations. But a thorough knowledge of the science can be gained only through laboratory methods and with a microscope. About the Publisher Forgotten Books publishes hundreds...
